NeoVim Latex — Snippets from Vim-Snippets *

Rafael Serrano-Quintero

July 29, 2022

1 Keybindings

- `<leader>+lv` → Forward search, goes to line in PDF.

- `<leader>+ll` → Start/stop compilator.

2 Sippets for Preamble

- `dcl` → \documentclass{}

- `dclo` → \documentclass[]{}

- `nc` → \newcommand

- `up` → \usepackage

- `nuc` → \newunicodecharacter

- `dmo` → \DeclareMathOperator

3 Snippets for Document

- `begin` → \begin{}...\end{}

- `mkt` → \maketitle

- `tab` → \begin{tabular}...\end{tabular}

- `thm` → \begin[]{thm}...\end{thm}

- `center` → \begin{center}...\end{center}

- `ali` → \begin{align}...\end{align}

- `gat` → \begin{gather}...\end{gather}

---

*I should be updating this often as I become more accustumed to Vim

- `enum` → `\begin{enumerate}...\end{enumerate}`

- `enuma` → `\begin{enumerate}[(a)]...\end{enumerate}`

- `enumi` → `\begin{enumerate}[(i)]...\end{enumerate}`

- `item` → `\begin{itemize}...\end{itemize}`

- `desc` → `\begin{description} \item \end{description}`

4 Equation Snippets

- `eq` → `\begin{equation}...\end{equation}`

- `eql` → `\begin{equation}...\label{eq:}\end{equation}`

- `\` → `\[\]`

- `eqnarray` → `\begin{eqnarray}...\end{eqnarray}`

- `lab` → `\label{...}`

$$f(x) - x := g(x) \tag{1}$$

Example 1. *This is an example of how to start a new environment.*
